

## Project 3

### Physics 250 Econophysics

This is a short project.

Estimate by some means: guessing, calculating, whatever, the value of the following market indices at the close (4:00 pm EDT) on March 16, 2013 (this is the last trading day prior to our last scheduled class on March 19):

S & P 500

NASDAQ

Dow Jones Industrial Average

I will compile these and we will compare them on the last day of class.
